Phone no: +919284360901 Email Address: harshalzarikar14@gmail.com
Address: Aurangabad, Maharashtra 431005

SUMMARY

Motivated and detail-oriented undergraduate with a strong foundation in Python, Machine Learning, Web Development, and Data Science. Demonstrated ability to identify and solve complex problems through internships and hands-on projects. Eager to join a dynamic organization where I can apply my technical skills, contribute to growth, and gain valuable industry experience.

EXPERIENCE

Machine Learning Intern, iNeuron.ai

- Developed and optimized machine learning models for real-world business applications.
- Worked extensively on data preprocessing, feature selection, and model tuning to improve model accuracy and efficiency.
- Collaborated with a team to implement models into production, ensuring scalability and robustness.
- Gained hands-on experience with end-to-end machine learning workflows, from data acquisition to deployment.

Data Science Intern, Feynlab

- Developed machine learning models for various applications, handling tasks like data preprocessing, feature engineering, and model evaluation.
- Optimized model performance and provided insights that supported data-driven decision-making.
- Presented findings and recommendations to stakeholders, contributing to project strategy and optimization.

PROJECTS

Emotion Detection from Images

- Developed a Convolutional Neural Network (CNN) model to detect human emotions from facial images with high accuracy.
- The model recognizes emotions like happiness, sadness, anger, and surprise through real-time analysis of user-uploaded images.
- Tech Stack:** Python, TensorFlow, OpenCV, Flask, CNN

IPL Scorecard Prediction

- Created a machine learning model to predict the final score of IPL cricket matches using historical match data.
- Utilized regression techniques to analyze patterns and improve prediction accuracy.
- Presented predictions and insights via a user-friendly interface for enhanced accessibility.
- Tech Stack:** Python, Pandas, Scikit-learn, Matplotlib.

E-Commerce Platform with Real-Time Recommendations

- Developed an **e-commerce website** featuring dynamic product listings and a collaborative filtering recommendation engine.
- Integrated secure user authentication and payment processing system for end-to-end functionality.
- Tech Stack:** Python, Flask, JavaScript, HTML/CSS

TECHNICAL SKILLS

Languages: Java, Python, C, C++, MySQL, HTML/CSS, JavaScript.
Developer Tools: Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm, Microsoft Office
Libraries: Pandas, NumPy, Matplotlib. TensorFlow, keras, Scikit– learn, OpenCV.
Other: Machine Learning , RestAPI ,Data structure and Algorithm, Object Oriented Programming(OOPS),Reactjs.
Soft Skills: Analytical thinking, Problem-solving, Time Management, Decision-making, Project management

CERTIFICATIONS

Machine Learning (Simplilearn)
